

St Andrew's Church Ampthill: Chapter House Windows and Door Replacement

Please see the table below for the dimensions of the current windows in the Chapter House, Slype, Kitchen, Vestry and Office.

The current windows and door were installed in the mid 1970s when the Chapter House was built. The current windows have aluminium frames with single glazing.

Please quote for the replacement of all the widows and door like for like (except window 3a) in accordance with current Building Regulations, with double glazed units.

We also require the door (Ref 5) to have an automatic open and close mechanism both inside and outside to meet the current disabled access regulations

All contact should be made through:
